

WHAT WE DO (Cont.)

FLYING PRACTICE.

We have a number of machines of varied types available for pilots wanting practice or desiring pleasure trips at specially low rates.  

SAFETY ATTENDANCE.

An air propellor driven Hydroplane is kept to give students practice in running fast over water, judging speeds and also as a safety attendant. Either the hydroplane or fast motor boat is always at hand in case of need.  

Student flying the Avro Biplane,
Tractor, 50 h.p. Gnome.
